

BRIJ
ENTERPRISES

About Us :

Brij Enterprises was established in the year 1991 with an aim of providing industrial minerals to manufacturing industries at competitive prices. Brij Enterprises is an innovation driven enterprise engaged in delivering fully integrated solutions of Raw Material supplies to large and medium industrial houses.

The company has a manufacturing plant located at village Melawas Tehsil Bhopalgarh, District Jodhpur with an installed capacity of 20000 MT of Quick Lime and 25000 MT of Hydrated Lime per annum. In addition to this, associate concerns of the company M/s Shri Balaji Chemical Industry situated at Village Riyan, Pipar, has manufacturing capacity of 18000 MT per annum of Hydrated Lime.

In order to ensure continuous and uninterrupted production the policies and infrastructure of the company are fully geared up to this requirement. Production bottleneck factors such as inadequate power supply, inadequate plant maintenance system, inadequate raw material supply, inadequate storage capacity, labour policy, etc all given very high importance and kept under well control.

Our Products :

Hydrated Lime/ Slaked Lime (Calcium Hydroxide)

Quick Lime/ Burnt Lime (Calcium Oxide)

Quick Lime Powder

Crushed Lime Stone

Lime Stone Powder

Calcined Dolomite

Calcined Dolomite Powder

We have all types of packaging facilities according to need of the client.

SMALL BAG

We are pioneers in a supply of Hydrated Lime Powder in Bulk.

Having 6 dedicated Bulkers to cater the need of specific customers. Our Bulker filling station is situated at village Galenda, p.o. Jolva dist. Bharuch. It is very much near to most of the our customers, in order to fulfill their daily requirements uninterruptedly.

JUMBO BAG

Application :

MAJOR PRODUCT APPLICATIONS

It is heartening to quote that our products are being used in wide variety of industries in India & abroad. Some of them are :

STEEL IND.

Lime is used as a fluxing agent in electric arc furnaces and basic oxygen furnaces. Lime removes impurities (for example, silica, phosphorus, sulfur) from the steel being manufactured.

PAPER IND.

Used as coagulant, Quick Lime aids in manufacture of sheet with grass and waste paper. Hydrated Lime is used for bleaching the same.

CHEMICAL IND.

Hydrated Lime is used in the manufacturing of : Bleaching Powder, Di calcium phosphate, propionate calcium citrate and calcium chloride etc.

WATER TREATMENT PLANT

Lime is used for both drinking water treatment and wastewater treatment. Almost all Municipal Corporation or Industrial wastewater treatments plants, are using lime to neutralized its bad effect.

ROAD BUILDING

Hydrated Lime can be used as an additive to hot mix asphalt used for road surfacing as it increase the resistance of the asphalt to water stripping, allowing it to maintain strength.

LEATHER IND.

Liming is one of the main steps carried out during leather production in the tannery. The main purpose of liming is to separate the hair from the hides.

SUGAR IND.

Hydrated lime (Calcium Hydroxide) is vital to the production of sugar from both sugar cane and sugar beets. Primarily used in the sugar industry for pH correction, it's also used to remove impurities and colour from the sugar solution during sugar refining.
